

Infor ERP SyteLine EDI

Conduct Faster, More Accurate Business Transactions

Infor ERP SyteLine Electronic Data Interchange (EDI) processes inbound and outbound EDI business documents within Infor ERP SyteLine for faster, more accurate business transactions. Infor ERP SyteLine EDI's supply-side EDI allows data interchange with vendors, while demand side EDI facilitates information flow with customers. Infor ERP SyteLine EDI uses a uniform flat-file interface for each transaction type that significantly reduces the information technology costs associated with building electronic commerce capability from scratch.

The Challenge

Competitive advantage today means going beyond improved operational efficiency to tighten the value chain that links suppliers, manufacturers, distributors, and customers. Electronic commerce is essential to synchronizing with your customers and suppliers; and electronic data interchange is a cornerstone of electronic commerce. Infor ERP SyteLine EDI helps you extend your enterprise system to meet the challenge of doing business more efficiently with all your trading partners.

For today's discrete, to-order manufacturers, electronic data interchange is no longer just an alternative way to conduct business. It's a necessity for gaining and maintaining competitive advantage. Whether one or more large customers have dictated EDI usage, or you have proactively chosen to leverage EDI to improve value chain relationships, EDI is clearly here to stay.

The Infor Solution

Manufacturers can rely on Infor ERP SyteLine EDI to simplify electronic commerce with quick and economical implementation. The product's open interface connects Infor ERP SyteLine, Infor's extended ERP software for the Microsoft platform, with most commercially available EDI translator software products.

Streamline scheduling and materials flow for faster processing

Expand data accuracy

Maximize process automation

Improve vendor relations

Speed cash flow

Open new markets

Build greater profitability

I discrete manufacturing

Infor takes pride in the 20 years of experience we have in the manufacturing industry. Using our deep base of industry knowledge and proven communications and planning applications, we help suppliers and manufacturers achieve their business goals.

We are passionately focused on providing comprehensive solutions that meet the unique challenges of the manufacturing industry on a global scale. Our solutions are comprehensive, open and modular, giving you the optimal choices to meet today's challenges and leverage tomorrow's opportunities.

Features

- **Translation Tools**
Exchange business information with flat files used by translation software packages.
- **Supply Side Processing**
Your suppliers can quickly establish the best way to ship and consolidate orders for processing and freight allowances. Electronic bills of lading, ship notices and shipping status reports help ensure dependable, timely deliveries to your production facilities. Efficient scheduling of labor and materials helps manage and control storage and production costs.
- **Inbound and Outbound Information Management**
Supply: purchase orders, purchase order acknowledgments
— Demand: forecasts, purchase orders
— Manufacturing: planning schedules
— Logistics: advance ship notices
— Finance and Accounting: invoices
- **End-to-end Capabilities**
Accommodate ongoing customer requirements and extend EDI advantages to both vendors and suppliers.
- **Automated Business Functions**
Support automatic data communication for order entry, shipping notices and invoices.
